

The Carbon Literacy Training Accreditation Process

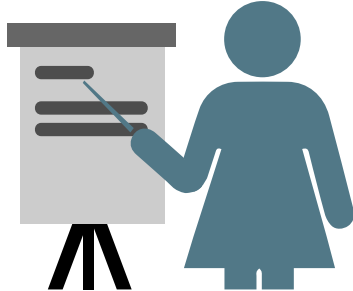

Engage with The Carbon Literacy Project

-We've contacted you
-We've met at an event
-You've approached us

Optional

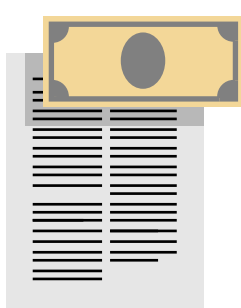

Carbon Literacy for Interested Organisations course:
A taster day where you will learn about the components of a CL course while becoming Carbon Literate

Beginning to design your course Your options:

1. Write your own

Resources and tools available

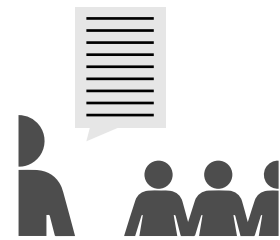

2. Work with or pay someone to write it for you

3. Adopt a CL course that's already available by or for organisations in your sector

4. Accredite an existing carbon reduction or sustainability training initiative

Criteria checking workshops

Resources on website

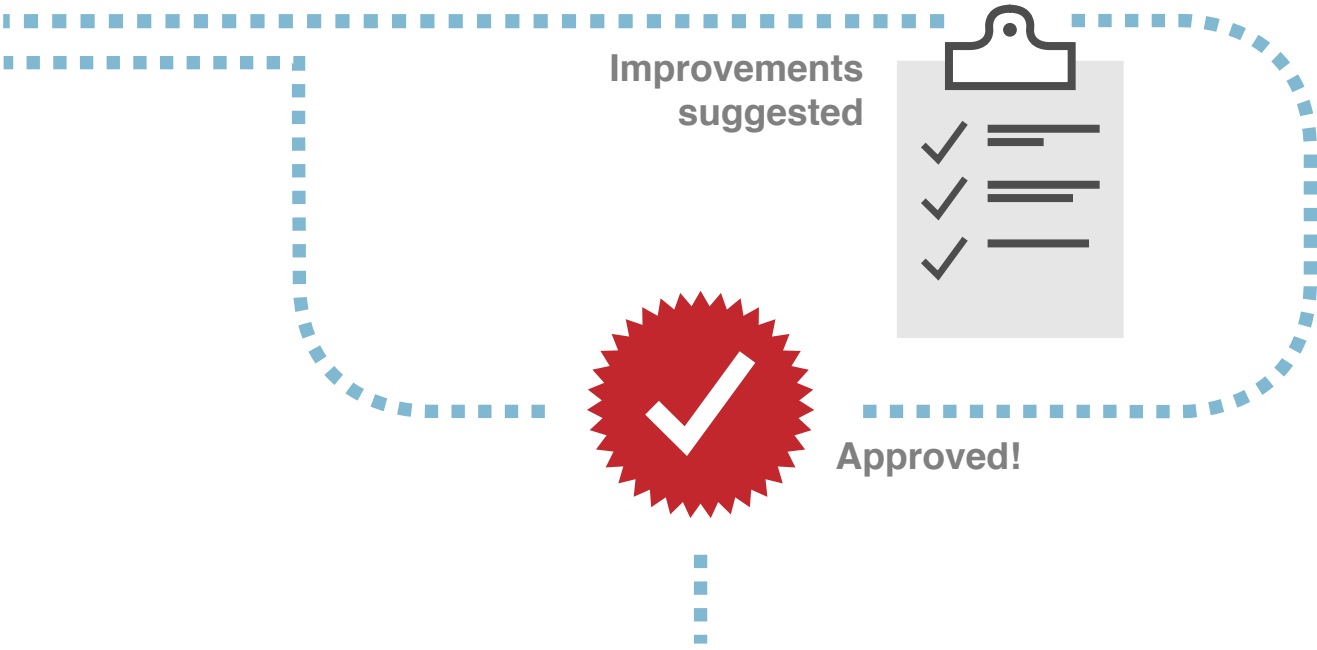

Course Kit: Resources mapped against the CL Standard

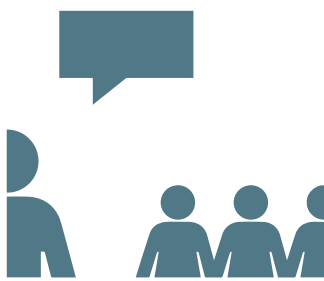

CLK E-learning: E-learning module delivering the 'Knowledge' section of the CL Standard

Submit the course for criteria checking

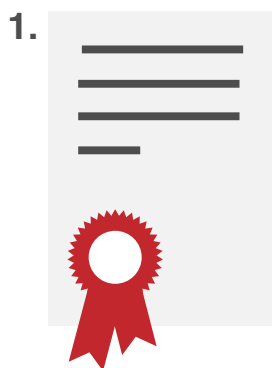

Optional

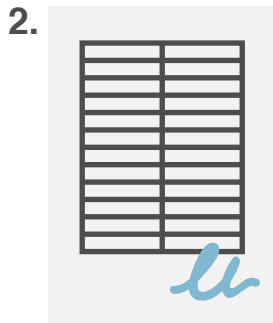

You or colleagues may wish to go on a Train-the-Trainer course to improve skills for delivery of CL.

Once approved, you can begin rolling out Carbon Literacy to your people!

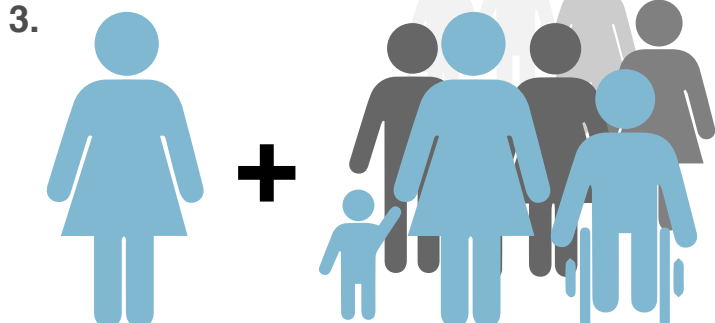

After each course, to certify your people you must submit:

Certificate request form (one per course)

Participant details form (for each participant)

Evidence of individual and group actions

The Project reviews the evidence submitted against the Carbon Literacy Standard, and successful participants are then certified as Carbon Literate.
