

Carbon Literacy for the Food Sector Pricing Matrix (£)

Please note that all prices are subject to change.

Prices shown reflect the real overheads of delivering Carbon Literacy, however The Carbon Literacy Project seeks to support small and 'low or un-funded' community-led initiatives, so pricing has been deliberately tiered to facilitate this.

Full details of the various Carbon Literacy certification and accreditation schemes and processes, and the benefits of adopting and achieving them, can be found in the Carbon Literacy, and related, Standards documents – all available to download from www.carbonliteracy.com.

Carbon Literacy for the Food Sector Shareable Course Materials:

Purchasing a licence for the Shareable Course materials enables peer to peer delivery within an organisation or delivery by a training provider / consultancy. The Shareable Food Course licence is a one off purchase and is ONLY valid for the delivery of Carbon Literacy training.

Materials include: a Carbon Literacy accredited course with introductory trainer manual, getting started pack, slides, trainer script, activity pack, references and peer reviewed evidence base.

Course adaptation and accreditation: Where you intend to change the Shareable Course beyond the defined 'editable' slides you may need to reaccredit your course with The Carbon Literacy Project. Please see the main [Carbon Literacy pricing matrix](#) following the pricing for 'subsequent course'.
